CRD/IARD # 141413
SEC File # 801-68010

This brochure provides information about the qualifications and business practices of Brookstone Capital Management, LLC. If you have any questions about the contents of this brochure, contact us at compliance@brookstonecm.com or (630) 653-1400. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission (SEC) or by any state securities authority.

Additional information about Brookstone Capital Management, LLC is available on the SEC's website at www.adviserinfo.sec.gov.

Brookstone Capital Management, LLC is a registered investment advisor. Registration with the United States Securities and Exchange Commission (SEC) or any state securities authority does not imply a certain level of skill or training.

ITEM 2 - SUMMARY OF MATERIAL CHANGES

This Form ADV Part 2A Brochure (“Brochure”) has been updated to reflect material changes. Our previous version of the Brochure was dated November 1, 2023. We encourage you to review this carefully and to contact your investment advisor representative with any questions you may have.

Pursuant to Rule 204-3(b)(2) of the Investment Advisers Act of 1940 (as amended), Brookstone Capital Management, LLC (“BCM”) can provide either a summary page of material changes and offer to provide this Brochure or a copy of the entire Brochure. Copies of the Brochure are available at any time by contacting either BCM at compliance@brookstonecm.com or your Investment Advisor Representative. The Brochure is also available on our website www.brookstonecm.com.

The following are material changes to this Brochure:

Starting in November 2024 a new fund will be made available for use from the affiliated firm Booster Asset Management, LLC (Booster) See *ITEM 5 Fee Schedules / Use of Our Affiliated Funds* for a list of conflicts of interest regarding the use of this fund.

Booster Asset Management, LLC (Booster), an affiliate of Brookstone Capital Management through common ownership, serves as the investment advisor to the Booster Income Opportunities Fund (BAMIX). Additionally, Brookstone Asset Management, LLC (BAM) serves as the sub-advisor to this fund. As the advisor and sub advisor to this fund, Booster and BAM earn management fees for investments made into these funds. This additional compensation that we earn from the internal management fees on our affiliated fund creates a conflict of interest by incentivizing us to use our fund instead of unaffiliated mutual funds. We seek to mitigate this conflict of interest by disclosing this additional compensation to you and providing advisory fee discounts on models that use these funds. Investors should carefully consider the fund’s investment objectives, risks, charges and expenses of this fund. This and other important information is contained in the fund prospectus and summary prospectus, which can be obtained from your financial professional and on the website boosterincomefund.com, and should be read carefully before investing.

ITEM 4 - ADVISORY BUSINESS

ABOUT US

Founded in 2006, Brookstone Capital Management, LLC ("BCM") is an investment advisory firm providing fee-based asset management services through its investment advisor representatives ("IARs") of BCM and IARs of its affiliate, Brookstone Wealth Advisors, LLC (also known as Retirement Wealth Advisors or RWA). BCM also provides these services to unaffiliated registered investment advisors ("RIAs") and their IARs who wish to have access to BCM's Platform of products and services (hereinafter, "Outside RIAs"; collectively referred to as "Advisors"). BCM offers its services through a turnkey asset management program ("TAMP") known as the "BCM Platform" or "Platform" and is sponsor of the BCM Wrap Account Program. Outside RIAs that engage BCM for the Platform will be required to execute a Selling Agreement and Solicitor's Agreement with BCM for these services. Through these agreements, BCM is appointed as a third-party asset manager with full discretion to perform investment management services to the Outside RIA's clients and appoints the Outside RIA to serve as a solicitor for BCM's Platform. Details relating to the BCM Platform are outlined below.

BCM is an investment advisor registered with the SEC, and is directly owned by AL BCM, LLC ("AL BCM"), a Delaware domiciled limited liability holding company. AL BCM is majority owned by Dean Zayed and AL Marketing, LLC (AmeriLife). Mr. Zayed received his Bachelor of Arts Degree in Economics from Northwestern University. He completed the Business Institutions Program, the undergraduate Leadership Program and was a member of Omicron Delta Epsilon Economics Honor Society. He received his Juris Doctor degree from Northwestern University School of Law. He received his Master's Degree in Taxation (LLM) from Chicago-Kent College of Law. Dean is a Certified Financial Planner (CFP®) and holds an Illinois insurance license for life, health and long-term care, in addition to being an IAR. Mr. Zayed is the CEO of BCM and provides the firm with principal management.

AL Marketing, LLC is a sub-division of AmeriLife Holdings, LLC ("AmeriLife"). AmeriLife is a Florida domiciled insurance company that markets and distributes annuity, life and health insurance products and is a portfolio company of Thomas H. Lee Partners, L.P, a private equity firm and Genstar Capital Partners, LLC, a private equity firm located in San Francisco, California ("Genstar").

INVESTMENT ADVISORY FIDUCIARY STANDARD

As investment advisors, BCM and its IARs act as fiduciaries for all of our investment management clients. This means that we have an obligation to act in the best interests of our clients and to provide investment advice in the clients' best interests. While BCM strives to not engage in activities that create a conflict of interest with our clients, if a conflict of interest does arise, we will disclose that conflict to the client. Reasonable care is employed by BCM and Advisors to avoid misleading clients and full and fair disclosure of all material facts (including fees) are made to our clients and prospective clients.

We fulfil our fiduciary obligations by collecting information about you and your investment goals so that our recommendations are customized to be in your best interests. We disclose our services, advisory fees, compensation arrangements and material conflicts of interest within this brochure and in the client agreement (Investment Policy Statement parts A and B) which are acknowledged by your signature.

THE BCM PLATFORM

As mentioned above, BCM offers the BCM Platform through its IARs, affiliated IARs and through Outside RIAs, each of which is responsible for implementing the Platform on behalf of its clients. BCM also sponsors a wrap-fee program. Please refer to BCM's Appendix 1 Wrap Brochure, for more information related to the firm's wrap-fee program. Models recommended as part of the Platform may include funds managed by BCM's affiliated investment advisors, Brookstone Asset Management ("BAM") and Booster Asset Management, LLC (Booster). Thus, a conflict exists. When BCM invests assets in your account in shares of our affiliated mutual funds and ETFs, you are subject to those funds' internal management fees and other expenses in addition to the annual management fee you pay us for advisory services. This additional compensation that we earn from the internal management fees on

our proprietary funds creates a conflict of interest by incentivizing us to use our funds instead of unaffiliated mutual funds and ETFs. We seek to mitigate this conflict of interest by disclosing this additional compensation to you and providing advisory fee discounts, which together help ensure transparent and fair pricing to our clients. Specific management fee and related expense information for the funds are found in the prospectus. Please refer to Item 10 of this Brochure for more information regarding these BCM affiliates.

ANNUITY RECOMMENDATIONS

Most BCM investment advisor representatives (IARs) also provide insurance or annuities to their clients when appropriate. Insurance, including fixed index annuities, are not offered through BCM but are sold by insurance licensed agents using various insurance companies. The issuing insurance companies are not affiliated with BCM. However, sometimes the fixed insurance product could be used as a replacement or alternative to the BCM fixed income portion of a portfolio. However, annuity products present their own differences from traditional fixed income securities, such as bonds, including, but not limited to liquidity, tax implications, and underlying fees. Unlike bonds, there is no secondary market for annuity products. Annuities also may be subject to caps, restrictions, fees and surrender charges as described in the annuity contract. Any annuity guarantees are backed by the financial strength and claims paying ability of issuer. BCM does not charge management fees on commission based fixed index annuities. However, if the IAR/insurance agent implements an insurance transaction, the agent will receive a sales commission from the recommendation of an insurance product, like a fixed index annuity. This creates a conflict of interest since the IAR/insurance agent is incentivized and earns insurance commission(s) for implementing insurance product recommendations. This conflict is mitigated by the IAR/insurance agent always acting in the best interest of the client and providing full and frank disclosure to the client when such a conflict exists.

If a BCM IAR is licensed as an insurance agent and makes a recommendation for transacting in a fixed annuity and/or life insurance product, this gives rise to conflicts of interest due to the fact that such BCM IAR is receiving remuneration in the form of commission and in some cases, other compensation (such as a percentage of an organizations' profits for selling fixed annuities and/or life insurance) which incentives such IAR to sell that product. BCM IARs mitigate this conflict by making recommendations that are in the client's best interest and are suitable for them based on their investment objectives and needs outlined in the client's investment policy statement.

SERVICES WE OFFER

BCM provides Asset Management and Financial Planning Services for its clients, each of which is described more fully below. Clients collaborate with Investment Advisor Representatives (IARs) to determine which services to employ to best help clients reach their financial goals.

Asset Management Services

BCM's principal service is providing fee-based investment advisory services through the BCM Platform. BCM manages investment portfolios, on a discretionary basis, depending on the particular custodial account, either based in a wrap-fee program or transaction-based program, and according to the client's objectives. BCM obtains data from potential clients addressing financial objectives, needs, risk tolerance, investment horizon and other pertinent information. This information is gathered and reported on an Investment Policy Statement (IPS) and Risk Profile Questionnaire and is analyzed by BCM IARs or RIAs. Once the analysis is completed, the IAR or RIA develops an investment strategy with the client that addresses specific investment styles and allocation of the client's assets. BCM may use a combination of equities, mutual funds, exchange traded funds, structured products (including certificates of deposit and notes), individual bonds, and options in securities to accomplish these objectives. BCM may partner with Sub-Advisory firms to create and manage portfolio strategies. A client's portfolio is allocated according to the client's risk profile and documented on the IPS.

BCM generally uses Unified Managed Accounts (UMA) whenever possible. This allows for multiple strategies to be managed and held within the same account. Accounts holding options cannot participate in UMA.

In addition, BCM offers discretionary Asset Management Services to clients through customized individual

investment accounts (aka separately managed accounts). In such accounts, BCM transacts in mutual funds, ETFs, equities, fixed income securities and other securities pursuant to the client's IPS information.

Asset Management Clients are encouraged to refer to the individual mutual fund or ETF prospectus for the risks associated with each specific fund.

Another asset management service available, the RAISE 360 Portfolios, consists of pre-selected model portfolio allocations created by BCM and its investment team to align with specific risk tolerances. These portfolios typically contain mutual funds, exchange traded funds, equities, and other securities authorized by BCM, and are managed on a discretionary basis by the BCM investment team pursuant to investment objectives as chosen by the client via the Risk Profile Questionnaire. Please see Items 5, 8 and 10 of this Brochure for more information related to our asset management fees, risks and conflicts of interest.

Financial Planning Services

Through its IARs, BCM also offers comprehensive financial planning services for individuals, families, and businesses. Our Financial Planning services include data gathering and analysis, along with creating a financial plan with specific recommendations and implementation advice tailored to client needs. Specific areas of advice include investment planning, insurance needs assessment and advice, retirement planning, cash flow management, debt consolidation, capital needs assessments, educational planning, estate planning, and business planning.

Fees for financial planning services are outlined in a Financial Planning Agreement signed by both the client and IAR, and any client participating in this program will receive a copy of the Financial Plan created.

Should a client decide to implement any recommendations contained in their financial plan, the client may, but is under no obligation to, utilize BCM or one of its IARs to implement those recommendations. Financial planning clients who wish to engage BCM for portfolio management services will be required to enter into a separate written agreement with the firm for such services, for which BCM is paid a separate and additional fee based on assets under management in accordance with the fee schedule set forth under Fees and Compensation, below.

As part of the financial plan, BCM may also make estate planning recommendations. Clients are made aware both as part of this Brochure, and the client's individual agreement, that BCM does not provide tax or legal advice, and that it is the client's sole responsibility to find independent advice in connection with such services. BCM does however recommend the services of a third party affiliated law firm, Perkins & Zayed, PC, for performance of estate planning services. Should a client elect to utilize Perkins & Zayed, PC for estate planning services, the client will be required to enter into a separate written agreement for such services and pay applicable legal fees. Clients should be aware that any applicable legal fees are in addition to and separate from the financial planning fees incurred for services as outlined in the Financial Planning Agreement. Dean Zayed, founder and CEO of BCM, serves as Principal of Perkins & Zayed, PC. Consequently, such referrals to this law firm creates a conflict of interest since Mr. Zayed will receive remuneration as a Principal of the firm from any BCM referred legal engagement. Please see Item 10 for additional information.

There can be no assurance that BCM's financial planning services or any products recommended by a financial plan are at the lowest available cost. Clients are advised that conflicts of interest exist if BCM recommends its own investment management services, or a third party for which BCM will receive a referral fee. Specifically, clients should be aware that a conflict exists between BCM's interests and the interest of the client if the client implements the financial plan through the firm, or a recommended third party, for BCM will receive additional payment from the client in the form of advisory fees and/or referral fees. This could act as an incentive to BCM to make certain recommendations in the financial plan or to advise the client to instruct BCM to implement the plan. Clients also should be aware that other advisory firms may charge lower fees for providing such services.

Recommendations of Strategies Outside the BCM Platform

In addition to the programs managed through the BCM Platform, other programs offered by BCM are sponsored and managed by various outside and unaffiliated registered investment advisors. Each of these programs will have

disclosure documents (ADV Part 2A) which will further describe the program, account minimums, fees and risks. These additional disclosure documents are available from your IAR. Clients should be aware that by engaging in these services, they will pay a direct management fee to these program managers in addition to an indirect management fee to BCM.

401(K) Accounts (Services for Qualified Retirement Plans)

Under the Qualified Retirement Plan (QRP) program, the advisor may construct a model portfolio or customize a portfolio for each 401(k) plan account. The 401(k) plan is held at the custodian chosen by the 401(k) plan administrator. The portfolio is constructed based on the investments or funds available within each individual client's 401(k) plan. The IAR or Outside RIA shall provide investment management services by allocating and reallocating assets within the plan consistent with the model or portfolio allocation chosen by the client. Additional 401(k), 403(b), and other retirement plan advisory services are offered. These plans will vary based upon the third party administrator (TPA), plan custodian, and investment selections available under each plan. BCM may use independent third party advisors to manage the plan. In these instances, clients must receive copies of the third party advisor's Form ADV Part 2A and any other applicable disclosure documents and must complete the account opening paperwork required by the outside advisor.

Variable Annuities

BCM offers a variable annuity model through Nationwide. The investment selections for the variable annuity may be limited to the choices offered through the specific product. Specifics regarding the annuity are found in the annuity prospectus and application documents.

IMPORTANT INFORMATION RELATING TO THE FIRM'S SERVICES

Information Received by Individual Clients

BCM will not assume any responsibility for the accuracy of the information provided by the client. BCM is not obligated to verify any information received from the client or from the client's other professionals (e.g., attorney, accountant, etc.) and is expressly authorized to rely on such information. Under all circumstances, clients are responsible for promptly notifying BCM in writing of any material changes to the client's financial situation, investment objectives, time horizon, or risk tolerance. In the event that a client notifies BCM of changes in the client's financial circumstances, the firm will review such changes and recommend any necessary revisions to the client's portfolio.

Advisory Services, Agreements and Disclosures

Prior to engaging BCM to provide Asset Management or Financial Planning services, the client will be required to enter into one or more written agreements with BCM setting forth the terms and conditions under which the firm shall render its services (collectively the "Agreement"). In accordance with applicable laws and regulations, BCM will provide this brochure, the ADV Part 2B brochure that is specific to the IAR, the Wrap Brochure (if applicable), and the Client Relationship Summary (Form CRS) to each client or prospective client prior to or contemporaneously with the execution of the Agreement. The Agreement between BCM and the client will continue in effect until terminated by either party pursuant to the terms of the Agreement. Upon termination, any fees paid in advance will be prorated to the date of termination and any excess will be refunded to the client.

Neither BCM nor the client may assign the Agreement to a third party without the consent of the other party. Transactions that do not result in a change of actual control or management of BCM shall not be considered an assignment.

BCM will provide Asset Management services and Financial Planning services but will not provide custodial services. At no time will BCM accept or maintain custody of a client's funds or securities. Client is responsible for all custodial and securities execution fees charged by the custodian and executing broker/dealer, unless otherwise negotiated. Please refer to the Brokerage Practices section for more information.

Serving as a Sub-Advisor to Independently Sponsored Advisory Programs

BCM may from time to time participate as a sub-advisor under other firms' advisory programs. A client of the other firm selects a registered investment advisor, such as BCM, from a list of approved advisors to provide investment management services. BCM receives a fee for account management services provided to clients of an outside firm as outlined in a sub-advisory agreement. This agreement may also outline items such as the advisory services to be provided, the responsibilities of BCM and the other firm and the terms of engagement including fees and termination. Responsibilities such as collecting the client's investment objectives, determining the strategy best suited for the client, and communication with the client will be the responsibility of the outside firm. BCM has no responsibility to assess the value of services provided by the outside firm, therefore the client should evaluate whether such a program is suitable for their needs and objectives, and whether comparable or similar services are available at a lower cost elsewhere.

Restrictions/ Guidelines Imposed by Clients

The advisory services described in this item are tailored to each client; if any client requires any restrictions on any types of stocks or market segments, the client needs to inform their IAR or RIA of the restrictions in writing. If, for any reason, BCM is not able to meet the client restrictions, the firm will notify the client of that fact.

ASSETS UNDER MANAGEMENT

BCM has discretionary assets under management of \$10.382 billion. The calculation for determining the assets under management was completed as of September 30, 2024.

ITEM 5 - FEE SCHEDULES

Brookstone Capital Management allows your IAR or Outside RIA to set fees within ranges provided by BCM. As a result, your investment advisor representative may charge more or less for the same service than another investment advisor representative of BCM. The exact fees and other terms will be outlined in the agreement between you and BCM as notated on the Investment Policy Statement (IPS) Part B. Clients should be aware that lower fees for comparable services may be available from other sources.

A portion of the fees charged for our direct asset management services offered through the BCM Platform are negotiable by each of our IARs or Outside RIAs based upon the type of client, the complexity of the client's situation, the composition of the client's account (i.e., equities versus mutual funds), the amount of active management of the client's portfolio, the relationship of the client with the IAR or Outside RIA, and the total amount of assets under management for the client.

Based upon the above negotiability factors, each IAR or Outside RIA is allowed to set BCM's total investment advisory fee up to a maximum amount of 2.5% annually. The fee charged to each client includes a portion attributable to BCM and a portion attributable to the IAR or Outside RIA, which is negotiable. The BCM fee can range up to .95% annually, depending on the model or strategy used, and the IAR or Outside RIA fee can be a maximum of 1.55%. For example, a common distribution for a total annual fee of 1.50% would include an allocation of .50% to BCM (including the asset based custodial fee if a wrap fee program is chosen) and an allocation of 1% to the advisor. This example is for illustrative purposes only. The actual total annual fee (which includes BCM's fee and the IAR/Outside RIA fee) charged for the BCM Platform will be specified in the client's agreement with BCM, Investment Policy Statement (IPS) Part B.

Due to BCM acting as investment advisor for both the account allocation, as well as manager of some proprietary mutual funds and ETFs, when these proprietary funds are used, we provide advisory fee discounts to ensure transparent and fair pricing to clients and to help mitigate conflicts of interest.

DESCRIPTION OF FEES; FEE SCHEDULE

Asset Management Fees

Depending on the custodian selected by the client, BCM can offer its asset management program as a wrap fee program. A wrap fee program is a program where BCM “wraps” both the asset management fees for advisory services and the transaction fees for execution services into a single fee charged to the client. Under a wrap fee arrangement, a client’s costs are the same regardless of the number of transactions in an account. Conversely in a non-wrap fee advisory account, a client would pay an asset management fee and a separate transaction fee for each transaction within the account. The overall cost a client incurs in a wrap fee program may be higher or lower than might be incurred by participating in a non-wrap program and paying transaction costs separately.

The wrap fee program is available for all BCM managed models that are held with Schwab. As such, client accounts held at Schwab and under BCM managed models do not have a choice between a wrap and a non-wrap account, and all client accounts will be charged on a Wrap Fee basis, as outlined below. For client accounts held at Fidelity Institutional, all clients will be part of a non-wrap fee program (or a transaction-based fee). Pursuant to the Agreement signed by each client, the client will pay BCM a monthly Management/ Wrap Program Fee, payable in arrears, prorated based on the amount of the assets managed by the advisor as of the opening of business on the first business day of each month. In the event a client should withdraw from a strategy mid-month the prorated advisory fee will be charged at that time.

The wrap fee covers (i) an initial analysis and periodic re-evaluation of the client’s investment objectives and needs, and discretionary allocation among portfolio managers, (ii) all advisory services, including fees of portfolio managers, (iii) account statements, (iv) execution, and (v) custody. The non-wrap fee covers the above, with the exception of execution costs. To the extent a client’s account is directed to a specific custodian either by the IAR or client, such direction may cause the account to incur higher fees or transaction costs than accounts utilizing alternative custodial arrangements due to the availability or lack thereof, of a wrap or non-wrap fee structure.

If you are participating in a wrap fee program (Schwab), you will not be charged brokerage commissions (transaction charges); however, please note that your brokerage account may be charged a service charge by the clearing firm, as well as potential account opening, closing, or similar servicing fees, in addition to your wrap fees. If you are participating in a non-wrap program, your account may be charged transaction fees. In some cases, no-transaction fee securities may be available in a non-wrap fee program (Fidelity) and BCM will endeavor to utilize no-transaction fee securities when possible and appropriate for the account. The no-transaction fee securities are available if the client elects for electronic delivery of statements and trade confirmations. Electing for paper or hard copies of statements and trade confirmations will result in additional costs.

Certain IRA accounts may be charged custodial or other service fees as well. If your account is invested in mutual funds, the mutual fund company may assess administrative charges against your investment in that fund. These fees are not charged by BCM, but rather by the product sponsor, brokerage firm, or custodian firm. In the normal course of effecting transactions, prices for certain trades made on behalf of your account may include mark-ups, mark-downs and spread differentials.

Additionally, all accounts will be charged a monthly \$8 fee, subject to change based on the terms, conditions, and fees of providers. In some cases, an account may not be subject to this monthly fee if the account has been grandfathered on a different fee schedule as disclosed in the client’s applicable advisory agreement. These fees will be deducted automatically from client accounts and shall be used by BCM to utilize software allowing the firm and its IARs to consolidate all accounts through a portfolio accounting system and create consolidated, on-demand performance reports. Moreover, clients will have the capability to create an online profile allowing them to login to BCM’s portfolio accounting system and view their own account in “real time” on a consolidated basis. The fee is charged regardless of whether the technology is used or not. As a courtesy, for any client accounts below \$8,000 in AUM, BCM will proportionately reduce this monthly fee by \$1 per every \$1,000.

The IAR or Outside RIA who recommends the BCM Platform receives compensation as a result of a client’s participation in the program. The amount of this compensation may be more than what the IAR or Outside

RIA would receive if the program client paid separately for investment advice, brokerage and other services. The IAR or Outside RIA therefore has a financial incentive to recommend the program over other programs and services. BCM may use both internal and external portfolio managers and they would receive a portion of the BCM advisory fee. The client agrees to pay a fee monthly, in arrears, for the advisory services provided by BCM pursuant to the Agreement signed by each client. The fee is calculated based on the value of the account on the last day of the month, prorated to the number of days the account is funded.

Certain fees may be negotiated by the IAR or Outside RIA at the sole discretion of the advisor. Asset management fees are automatically deducted from the client account on a monthly basis by the custodian. Clients may request to terminate their advisory contract with BCM, in whole or in part, by providing 30 days advance written notice.

Regulatory Fees

To facilitate the execution of trades, regulatory Trading Activity Fees (TAF) are added to applicable sales transactions. The Securities and Exchange Commission (SEC) regulatory fee is assessed on client accounts for sell transactions, and a FINRA fee is assessed on client accounts for sell transactions, for certain covered securities. This fee is not charged by BCM but is assessed and collected by the custodians, Schwab and Fidelity. Schwab and Fidelity, the custodians that BCM uses, are FINRA member firms. These fees recover the costs incurred by the SEC and FINRA, for supervising and regulating the securities markets and securities professionals.

The fee rates vary depending on the type of transaction and the size of that transaction. Trading Activity Fees rates are: \$0.000119 per share for each sale of a covered equity security, with a maximum of \$5.95 per trade, \$0.002 per contract for each sale of an option, \$0.00075 per bond for each sale of a covered bond with a maximum charge of \$0.75 per trade. All charged fees will be rounded to the nearest penny using natural rounding logic. For a rounding example, \$0.004 rounds to \$0.00 and \$0.016 rounds to \$0.02.

An example of an equity TAF, if 100 shares of a covered equity were sold, the fee would be $\$0.000119 \times 100$ which equals \$0.0119, which would be rounded to \$0.01.

For more information on the SEC and FINRA fees, please visit their websites:

www.sec.gov/fast-answers/answerssec31htm.html

www.finra.org/industry/trading-activity-fee

Financial Planning Services Fees

As mentioned under Services We Offer, BCM also offers comprehensive financial planning services for individuals, families and businesses. BCM charges an hourly fee of up to \$350 per hour, billed in six minute increments, for financial planning services. In certain instances, or for those clients who desire it, BCM may charge a fixed fee for financial planning services. Fixed fees can range from \$200 to \$5,000 or more, and are based on the complexity of the work required. All financial planning fees are negotiable and are outlined in the Financial Planning Agreement signed by both the client and the IAR.

Variable Annuity Fees

The fee for the variable annuity management program can be a maximum of 2.05% annually with the IAR receiving up to 1.55% and BCM receiving 0.5%. This fee and other fees charged by Nationwide are described in the prospectus and account opening documents. The client should review the prospectus carefully before investing.

ADDITIONAL FEE INFORMATION AND DISCLOSURES

All fees paid to BCM for investment advisory services are separate and distinct from the fees and expenses charged by Mutual Funds, Exchange Traded Funds (ETFs), Variable Annuities, and other Investment Managers, broker/dealers and custodians retained by clients, if any. Such fees and expenses are described in each Mutual Fund's and Variable Annuity's prospectus, each Manager's Form ADV Part 2A, Wrap Brochure or similar disclosure statement, and by any broker/dealer or custodian retained by a client. Mutual Fund, Variable Annuities, and Manager fees generally include a management fee, fund expenses, and related fees. Refer to the Mutual Fund

or Variable Annuity prospectus for a complete description of fees and services. Certain ETFs pay advisory fees to their investment advisors, which reduces the net asset value of the fund. Some ETFs are organized as unit investment trusts and do not have an investment advisor. However, all ETFs do incur expenses related to their management and administration that are analogous to an investment advisor's management fee. These expenses affect the value of the investment.

Furthermore, clients may incur brokerage commissions and other execution costs charged by the custodian or executing broker/dealer in connection with transactions for a client's account. Clients should further understand that all custodial fees and any other charges, fees and commissions incurred in connection with transactions for a client's account will be paid out of the assets in the account. Please refer to the Brokerage Practices section of this Brochure for additional important information about the brokerage and transactional practices of BCM. Accordingly, the client should review both the fees charged by the product sponsor and the fees charged by BCM to fully understand the total fees to be paid.

Use of Our Affiliated ETFs

Brookstone Asset Management ("BAM"), an affiliate of BCM, serves as the investment advisor to the following:

- BAM Growth Stock ETF
- BAM Value Stock ETF
- BAM Dividend Stock ETF
- BAM Ultra-short Bond ETF
- BAM Intermediate Bond ETF
- BAM Active ETF
- BAM Opportunities ETF
- BAM Yield ETF

As the advisor to these funds, BAM earns management fees for investments made into these funds.

When BCM invests assets in your account in shares of our affiliated ETFs, you are subject to those funds' internal management fees and other expenses in addition to the annual management fee you pay us for advisory services. This additional compensation that we earn from the internal management fees on our proprietary funds creates a conflict of interest by incentivizing us to use our funds instead of unaffiliated ETFs. We seek to mitigate this conflict of interest by disclosing this additional compensation to you and providing advisory fee discounts, which together help ensure transparent and fair pricing to our clients. Specific management fee and related expense information is found in the prospectus and other offering documents as noted in the previous section. We want clients to understand that our funds were created and added to various models in order to help offset transaction costs of investing in individual stocks, as well as to seek to achieve greater conformity with the desired target weights for each individual stock in a given model. BCM is committed to its obligation to ensure associated persons adhere to the Firm's Code of Ethics and to ensure that the Firm and its associated persons fulfill their fiduciary duty to clients. Portfolio holdings are monitored to ensure they are consistent with the client's objectives and representatives are not incented to direct client investments to models that have a higher percentage of assets in our proprietary funds.

For a complete description of these fees, and the fund investment objective and risks, please refer to the fund prospectus and Item 10 of this Brochure.

Use of Our Affiliated Mutual Fund

Booster Asset Management, LLC (Booster), an affiliate of BCM, serves as the investment advisor to the following:

- Booster Income Opportunities Fund

Additionally, BAM serves as the sub-advisor to this mutual fund. As the advisors to this fund, Booster and BAM earn management fees for investment made into this fund. This additional compensation that we earn from the

internal management fees on our affiliated fund creates a conflict of interest by incentivizing us to use our fund instead of unaffiliated mutual funds. We seek to mitigate this conflict of interest by disclosing this additional compensation to you and providing advisory fee discounts on models that use these funds. Investors should carefully consider the fund's investment objectives, risks, charges and expenses of this fund. This and other important information is contained in the fund prospectus and summary prospectus, which can be obtained from your financial professional and on the website boosterincomefund.com, and should be read carefully before investing.

TRADE ERRORS

It is BCM's policy to correct all trading errors immediately upon notification of the error. Trading errors can take many forms, including but not limited to executing trades in the incorrect account, for the incorrect share amount or price, with an incorrect instruction, or in an incorrect security. In most instances, when an error is detected, the error will be moved to BCM's Error Account for correction. If the error results in a gain, BCM may use the gain to offset trade error losses, allow the client to keep the gain, or donate the gain to charity. If the error results in a loss, BCM will make the client whole by reversing or otherwise as appropriate fixing the error, or by crediting the account for any loss.

OTHER COMPENSATION

In addition, from time to time, BCM may initiate incentive programs for IARs or Outside RIAs. These programs may compensate them for attracting new assets and clients promoting investment advisory services. BCM may also initiate programs that reward IARs or Outside RIAs who meet total production criteria, participate in advanced training and/or improve client service. IARs or Outside RIAs who participate in these incentive programs may be rewarded with cash and/or non-cash compensation, such as deferred compensation, bonuses, training symposiums, marketing assistance and recognition trips. These incentive programs are paid for by BCM and do not affect fees paid by the client.

ITEM 6 - PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT

BCM does not charge performance-based fees (i.e., fees calculated based on a share of capital gains upon or capital appreciation of the funds or any portion of the funds of an advisory client). Consequently, BCM does not engage in side-by-side management of accounts that are charged a performance-based fee with accounts that are charged another type of fee (such as assets under management).

ITEM 7 - TYPES OF CLIENTS

BCM generally provides investment advice to individuals, pension and/ or profit sharing plans, trusts, estates, charitable organizations, corporations and other business entities. Requirements for opening an account could vary depending on the program selected, but typically minimum account size requirements are between \$5,000 and \$100,000. BCM may, at its discretion, accept accounts below the minimum required amount. Prior to engaging BCM to provide any of the investment advisory services described in this Brochure, the client will be required to enter into a written agreement setting forth the terms and conditions under which the firm shall render its services.

ITEM 8 - METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS

METHODS OF ANALYSIS

Methods of analysis and investment strategies include charting, fundamental, tactical, cyclical and technical analysis, independent research, and asset allocation implementation strategies. Proprietary software programs may be used to identify market points where either "buy" or "sell" signals are recognized. These signals assist the managers in implementing the specified management strategies of the various managed programs. Quantitative

analysis can also be used when analyzing securities. This analysis uses current and historical pricing information to help identify trends in both the domestic and foreign equity and fixed income markets. Technical indicators such as moving averages and trend lines may be further used to identify entry and exit points. Various fundamental data such as overall economic conditions, industry outlook, interest rates and political climate are also considered.

INVESTMENT STRATEGIES AND RISK

All investment strategies involve risk. There is no assurance that a positive return will be obtained in any managed investment account program. Neither BCM IARs nor sub-advisors guarantee the performance of the account, or promise any specific level of performance, or promise that investment decisions, strategies or overall management of the account will be successful. Any investment decisions sub-advisors may make for clients are subject to various market, currency, economic, political, interest rate and business risks, will not necessarily be profitable, and are subject to investment risk, including possible loss of principal.

In choosing investment programs utilized by the firm, BCM measures and selects strategies based on length and verifiability of track record, the fund manager's tenure and/or overall career performance, the fund management continuity, investment philosophy and process, and other factors believed to effect account performance. BCM or the IAR may recommend, on occasion, redistributing investment allocations to diversify the portfolio in an effort to reduce risk and increase performance and may recommend buying or selling positions for reasons that include, but are not limited to, harvesting capital gains or losses, business or sector risk exposure to a specific security or class of securities, valuation of the position(s) in the portfolio, change in risk tolerance of client, or any risk deemed unacceptable for the client's risk tolerance.

Please see below for a list of available investment strategies available through BCM. The strategies are divided by the type of investment methodology used. Please refer to the Risk Profile Questionnaire to help determine a recommended allocation amongst these categories. For a more complete description of the individual strategies, please refer to the Investment Policy Statement Part A.

DEFINITIONS OF INVESTMENT APPROACHES

Strategic Asset Allocation

Strategic asset allocation uses long-term asset class risk and return metrics and targets to maintain a set combination of major asset classes consistent with the risk level of the asset allocation.

Dynamic Asset Allocation

Dynamic asset allocation is an active strategy that adjusts the allocation of assets based on medium term views.

STRATEGY OVERVIEW

BCM Raise 360° Model Series

The BCM Model Series consists of pre-selected model portfolio allocations created by Brookstone and its investment team to align with specific risk tolerances. These portfolios may contain mutual funds, exchange traded funds, equities, and other securities authorized by Brookstone, and are managed on a discretionary basis by the Brookstone investment team pursuant to investment objectives as chosen by the client via the Risk Tolerance Questionnaire. Each model series has five risk profiles: Conservative, Moderately Conservative, Moderate, Moderately Aggressive, and Aggressive.

Star Series

Strategic asset allocation risk-based portfolios.

Select Series

Dynamic asset allocation risk-based portfolios.

Summit Series

Strategic + Dynamic blended risk-based portfolios.

Smart Beta Series

Strategic low volatility risk-based portfolios.

Sustainable Series

Strategic ESG screened risk-based portfolios.

Tax Aware Series

Strategic passive tax aware risk-based portfolios.

Individual Stock Strategies**Dividend Stock Basket**

The strategy invests in a basket of high-quality, above average dividend paying stocks. The primary objective is steady dividend income with a secondary objective of growth in the dividend.

Growth Stock Basket

The strategy invests in a concentrated basket of growth-oriented stocks. The primary objective is capital appreciation.

Value Stock Basket

The strategy invests in a concentrated basket of value-oriented stocks. The primary objective is capital appreciation with a secondary objective of income.

Options Enhanced Strategies

Options enhanced strategies use options as part of the strategy. The options are held as part of the strategy inside the investment vehicle (ETFs) for the strategies outlined below, except for the BCM SmartOption which would hold the option directly.

The BCM Buffer Strategies provides a suite of managed Defined Outcome ETF strategies. Defined Outcome or Buffer ETFs are an investment vehicle that provide different levels of downside protection during an outcome period. Buffer ETFs are launched monthly with new starting buffers and cap levels. As markets change, the strategy attempts to actively manage the holdings seeking to expand upside potential and reset buffer levels staying aligned with the most recent terms. The three strategies that comprise the strategies today are outlined below.

BCM Buffer

Utilizes a combination of Buffer ETFs that buffer the first 9 (or 10%) of the downside over the outcome period.

BCM Power Buffer

Utilizes a combination of Buffer ETFs that buffer the first 15% of the downside over the outcome period.

BCM Ultra Buffer

Utilizes a combination of Buffer ETFs that buffer between a 5% and 30% (or 35%) of the downside.

BCM SmartOption

The strategy is comprised of a long-term core equity portfolio using the ETF SPY, with a constant protective put option overlay. The protective put is used for risk mitigation, not leverage. This blended combination provides an efficient hedged equity portfolio in one convenient strategy. The strategy is designed to offer investors long-term core equity exposure with lower volatility over time.

BCM Covered Call

The BCM Covered Call Strategy blends several covered call writing strategies into one convenient strategy. The strategy allocates to ETFs that allocate to an underlying stock basket or index that writes (sells) call options to generate an income cash flow from the underlying equity holdings. This strategy does not employ leverage and provides daily liquidity. Option premiums fluctuate with market volatility. Covered call ETF distributions may not be stable and are not guaranteed. Covered call writing can limit the upside potential of the underlying security.

Bond Strategies

BCM Multi-Sector Bond

The Multi-Sector bond strategy is comprised of a combination of bond strategies using either mutual funds or ETFs.

BCM Municipal Bond

The Municipal bond strategy is a combination of municipal bond strategies using either mutual funds or ETFs.

INDIVIDUALLY SELECTED ALLOCATIONS

ETF Strategies

The individual ETFs listed below are managed by Brookstone Capital Management's affiliate, Brookstone Asset Management. Please refer to the Use of our Affiliated ETFs section under Additional Fee Information and Disclosures in Item 5 above for more information.

BAM Dividend (BAMD)

An actively managed dividend equity strategy.

BAM Value (BAMV)

An actively managed value-oriented equity strategy.

BAM Growth (BAMG)

An actively managed growth-oriented equity strategy.

BAM Ultra-Short Bond (BAMU)

An actively managed ultra-short bond strategy.

BAM Intermediate Bond (BAMB)

An actively managed intermediate bond strategy.

BAM Yield (BAMY)

An actively managed yield-oriented strategy.

BAM Active (BAMA)

An actively managed asset allocation strategy with targeted equity exposure ranging between 40-80%.

BAM Opportunities (BAMO)

An actively managed and high conviction asset allocation strategy with targeted equity exposure ranging between 0-100%.

Booster Income Opportunities Fund (BAMIX)

A structured note interval fund.

BCM Structured Notes

Structured Notes may help investors meet their specific financial goals and provide greater diversification to their investment portfolios. Structured Notes encompass a variety of structures and terms. The Notes consist of a debt security linked to the performance of a reference asset (equity, basket of equities, equity index, commodity, commodity index or foreign currency). Among the variety of structures available, most aim to help investors to achieve the following primary objectives: minimize the loss of principal, generate higher yields or participate in enhanced returns. These securities are not bank deposits and are not insured by the Federal Deposit Insurance Corporation (FDIC) or any other governmental agency, nor are they obligations of, or guaranteed by, a bank. On a monthly basis we offer a variety of Structured Notes. These Notes are selected at the beginning of the month and due to the nature of this product, each Note has limited availability and may close to investors before the specified closing date and no longer be available.

Flash Notes

Custom BCM income-oriented notes from various issuers.

Calendar Roster Notes

A curated roster of structured notes from various issuers.

Open Architecture

Advisors may select individual holdings using mutual funds, exchange traded funds, equities, fixed income securities and other securities authorized by Brookstone on a discretionary basis pursuant to investment objectives chosen by the client. Clients should refer to the individual mutual fund or ETF prospectus for the risks associated with each specific fund.

DEFINITIONS OF RISKS

Equity Strategy Risk

The primary risk of investing in equity securities is that they may decline in value for a variety of reasons, including a broad market downturn, unfavorable developments affecting an entire industry, and specific events affecting a single company. The following is a partial list of the risks associated with investing in various types of equity securities:

- An investment in equity securities should be made with an understanding of the risks involved with owning common stocks (i.e., market risk), such as an economic recession and the possible deterioration of either the financial condition of the issuers of the equity securities (i.e., financial risk) or the general condition of the stock market.
- An investment in foreign stocks is subject to additional risks, including foreign currency fluctuations (i.e., currency or exchange- rate risk), foreign political risks, foreign withholding, possible lack of adequate financial information, and possible exchange control restrictions impacting foreign issuers. These risks may be more pronounced in emerging markets where the securities markets are substantially smaller, less liquid, less regulated and more volatile than developed foreign markets.
- An investment in small-capitalization or mid-capitalization companies may be more volatile than investments in larger, more established companies, and securities of small and mid- size companies typically have more limited trading volumes.
- A portfolio may be concentrated in a particular industry or sector which involves more risk than a broadly diversified portfolio (i.e., allocation risk).
- An investment in a particular industry or company within an industry is subject to the risk that the company will go bankrupt or perform below expectations (i.e., business risk). Every company has the business risk that the broader economy will perform poorly and therefore sales will be poor and also the risk that the market simply will not like its products.

Preferred Stock Risk

The following includes some of the risks associated with investments in preferred stocks:

- Interest Rate Fluctuation - Preferred stocks typically pay a fixed dividend. This tends to make the market price of preferred stocks interest rate-sensitive, similar to bond prices in the secondary market. If prevailing interest rates drop, the market price of preferred stocks tends to rise. But if prevailing interest rates rise, preferred stock prices tend to fall.
- No Dividend Guarantees - Preferred stocks are equity securities, as are common stocks. The dividend on preferred stocks must typically be paid before any dividends can be paid to common stockholders. But the dividends are not guaranteed in the same way that interest payments on the company's bonds are guaranteed. If the company misses an interest payment on its bonds, it is in default of its bond indenture, and bondholders can pursue legal action against company. If the company misses a preferred dividend payment, it's not in default.
- Call Provision - Some preferred stocks include a call provision, which allows the company to redeem its preferred shares on demand. A company is most likely to call its preferred stock when prevailing interest rates fall. In that situation the company could lower its expenses by redeeming the stock for its par value, then reissue it to take advantage of the lower prevailing interest rates.

- Liquidation Risk - If the company goes bankrupt, preferred stockholders must wait until all of the company's creditors are made whole before they have any claim on the company's assets. Bondholders get their money before preferred stockholders.
- Credit quality - While not all preferred stocks are in the junk category, they seldom are highly rated.

Risks Involved with Trading on Margin

Margin is the borrowing of money to purchase securities. There are a number of risks that all investors need to consider in deciding to trade securities on margin. These risks include the following:

- You can lose more funds than you deposit in the margin account. A decline in the value of securities that are purchased on margin may require you to deposit additional funds to avoid the forced sale of those securities or other securities in your account.
- The firm can force the sale of securities in your account. If the equity in your account falls below the maintenance margin requirements under regulations the firm can sell the securities in your account to cover the margin deficiency. You will also be responsible for any short fall in the account after such a sale.
- The firm can sell your securities without contacting you.
- You are not entitled to an extension of time on a margin call. While an extension of time to meet initial margin requirements may be available to customers under certain conditions, a customer does not have a right to the extension. In addition, a customer does not have a right to an extension of time to meet a maintenance margin call.
- Margin Interest –You're responsible for repaying the interest on your margin loan regardless of any changes in interest rates that occurred during the time your loan was outstanding or changes in the market value of the securities you bought on margin.

Mutual Fund Risk

- Investing in other investment companies (mutual funds) is subject to risks affecting the investment company, including the possibility that the value of the underlying securities held by the investment company could decrease. Moreover, such an investment will incur its pro rata share of the expenses of the underlying investment companies' expenses. Information on a specific mutual fund risk and its policies regarding the above topics can be found in its prospectus and Statement of Additional Information. Clients are encouraged to review the prospectus before investing.

ETF (Exchange Traded Fund) Risk

ETFs are each unique securities in their own right and are subject to additional risks that are discussed below:

- ETFs are subject to the funds' managements' abilities to manage the underlying portfolios to meet the funds' stated investment objectives.
- ETFs also may trade at a discount to their net asset value in the secondary market. The structure of an ETF is such that most ETFs' market prices tend to track the funds' respective net asset value closely, but this may not always be the case, particularly during periods of extreme market volatility.
- Most ETFs are designed to track a specified market index; however, in some cases an ETF's return may deviate from the specified index. Certain ETFs are actively managed ETFs and are subject to management risk. Furthermore, unlike open-end funds, investors are generally not able to purchase ETF shares directly from the fund sponsor nor redeem ETF shares with the fund sponsor. Rather, only specified large blocks of ETF shares called "creation units" can be purchased from, or redeemed with, the fund.
- Information on a specific ETF risk and its policies regarding the above topics can be found in its prospectus and Statement of Additional Information. Clients are encouraged to review the prospectus before investing.

Concentration Risk

If the Index concentrates in an industry or group of industries the Fund's investments will be concentrated accordingly. In such event, the value of the Fund's Shares may rise and fall more than the value of shares of a fund that invests in securities of companies in a broader range of industries. Any fund that concentrates in a particular

industry will generally be more volatile than a fund that invests more broadly.

Energy Sector Risk

The profitability of companies in the energy sector is related to worldwide energy prices, exploration, and production spending. Such companies also are subject to risks of changes in exchange rates, government regulation, world events, depletion of resources and economic conditions, as well as market, economic and political risks of the countries where energy companies are located or do business. Oil and gas exploration and production can be significantly affected by natural disasters. Oil exploration and production companies may be adversely affected by changes in exchange rates, interest rates, government regulation, world events, and economic conditions. Oil exploration and production companies may be at risk for environmental damage claims.

Fixed Income Strategy Risk

The primary risk of investing in fixed income securities is that they may decline in value for a variety of reasons, including a broad market downturn, a rising interest rate environment, unfavorable developments affecting an entire industry, and specific events affecting a single company. The following is a partial list of the risks associated with investing in various types of fixed income securities:

- All bonds are subject to various risks including higher interest rates as fixed income securities typically decline in value as interest rates rise, economic recession, possible rating downgrades by one or more rating agencies, and possible defaults of interest and/or principal payments by the issuer.
- Future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e., interest rate risk). This primarily relates to fixed income securities.
- High-yield or “junk” bonds are rated below investment grade and are subject to a higher risk of rating downgrade and issuer default than investment-grade bonds, and are more affected by an economic recession. The prices of high-yield bonds tend to fluctuate more than those of investment grade bonds.
- Fixed income securities issued by foreign issuers are subject to additional risks including foreign currency fluctuations, foreign political risks, foreign tax withholding, possible lack of adequate financial information and possible exchange control restrictions. Additionally, these risks may be more pronounced in emerging markets where the securities markets are substantially smaller, less liquid, less regulated, and more volatile than developed foreign markets.
- Municipal bonds are issued by states, counties or other municipal authorities and are subject to additional risks, including deterioration in the financial condition of the municipal issuer and potential changes in tax laws affecting the tax-free status of municipal bonds.
- Mortgage-backed securities may be more sensitive to changes in interest rates than traditional fixed income securities as rising rates tend to extend the duration of such securities. In addition, mortgage-backed securities are subject to prepayment risk, since borrowers may pay off their mortgages sooner than anticipated, particularly during a period of declining interest rates. Subprime mortgage-backed securities are subject to a higher risk of rating downgrade or defaults than higher rated mortgage-backed securities.
- Senior loan securities are high-yield, floating rate corporate debt securities which are senior in a company's capital structure to unsecured debt securities. Like all high-yield securities, such securities carry a heightened risk of a rating downgrade or issuer default than investment grade securities.

Structured Notes Risk

A purchaser should evaluate and understand all of the risks and costs of an investment in Structured Notes (SNs) prior to making any investment decision. A purchase of an SN entails other risks not associated with an investment in conventional bank deposits. A purchaser may not have a right to withdraw his/her investment prior to maturity or could incur substantial penalties for an early withdrawal, if permitted. A purchaser should carefully read the disclosure statement and any other disclosure documents for a SN before investing.

An investment in SNs is not FDIC insured and is subject to credit risk. The actual or perceived creditworthiness of the note issuer may affect the market value of SNs. SNs will not be listed on any securities exchange. Even if there is a secondary market, it may not provide enough liquidity to allow purchasers to trade or sell SNs. As a holder of SNs, purchasers will not have voting rights or rights to receive cash dividends or other distributions or other rights

in the underlying assets or components of the underlying assets. Certain built-in costs are likely to adversely affect the value of SNs prior to maturity. The price, if any, at which the notes can be purchased in secondary market transactions, if at all, will likely be lower than the original issue price and any sale prior to the maturity date could result in a substantial loss. SNs are not designed to be short-term trading instruments. Purchasers should be willing to hold any notes to maturity. The tax consequences of SNs may be uncertain. Purchasers should consult their tax advisor regarding the U.S. federal income tax consequences of an investment in SNs. If a SN is callable at the option of the issuer and the SN is called, the holder will receive only the applicable redemption amount and will not receive any coupon payments that would have been payable for the remainder of the term of the SN. SNs are Not FDIC Insured, May Lose Principal Value and are Not Bank Guaranteed.

Multi-Asset Strategy Risk

As multi-asset strategies can utilize an array of investment vehicles, the above risks described for equity and fixed income strategies will be present if those vehicles are used. Other vehicles possibly used within these strategies also have risks associated with them. For example, the performance of commodity-linked investments, including derivatives, may depend on the performance of the overall commodities markets and on other factors that affect the value of commodities, including weather, political, tax, and other regulatory and market developments. Commodity-linked notes may be leveraged. Commodity-linked investments may be hybrid instruments that can have substantial risk of loss with respect to both principal and interest. Commodity-linked investments may be more volatile and less liquid than the underlying commodity, instruments, or measures and are subject to the credit risks associated with the issuer, and their values may decline substantially if the issuer's creditworthiness deteriorates. As a result, returns of commodity-linked investments may deviate significantly from the return of the underlying commodity, instruments, or measures. Legal and regulatory changes also can affect the value of these investments.

Options Strategies Risk

Options may be used to create implied leverage in a portfolio – meaning the account controls more shares than it could otherwise purchase with the same amount of capital. Markets can move suddenly, swiftly, and without notice; these movements can be severe in size and longevity. In a sharp downward moving market, the loss in a strategy utilizing options may accelerate quickly because of the implied leverage - it depends on the conditions of the trade cycle. Strategies utilizing options may only be suitable for an investor who understands the risks and has the financial capacity and willingness to incur potentially substantial losses. The value of derivatives, including options, futures and options on futures also may be adversely affected if the market for derivatives is reduced or becomes illiquid. No assurance can be given that a liquid market will exist when BCM seeks to close out a position. Reasons for the absence of a liquid secondary market on an exchange include the following: (i) there may be insufficient trading interest in certain derivatives; (ii) restrictions may be imposed by an exchange on opening transactions or closing transactions or both; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of derivatives; (iv) unusual or unforeseen circumstances may interrupt normal operations on an exchange; (v) the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to handle the then-current trading volume; or (vi) one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of derivatives (or a particular class or series of derivatives). If trading were discontinued, the secondary market on that exchange (or in that class or series of derivatives) would cease to exist. However, outstanding options on that exchange that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms. Investing in derivative instruments also includes interest rate, market, credit and management risks, and the risk of mispricing or improper valuations. Changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, and the investment could lose more than the principal amount invested.

Cryptocurrency Risk

Digital currency is a digital representation of value that functions as a medium of exchange, a unit of account, or a store of value, but it does not have legal tender status. Digital currency is not backed nor supported by any government or central bank. Digital currency's price is completely derived by market forces of supply and demand, and it is more volatile than traditional currencies and financial assets.

Investing in digital currency comes with significant risk of loss that a client should be prepared to bear, including, but not limited to, volatile market price swings or flash crashes, market manipulation, economic, regulatory, technical, and cybersecurity risks. In addition, digital currency markets and exchanges are not regulated with the same controls or customer protections available in equity, option, futures, or foreign exchange investing.

- **Volatility Risk:** Digital currency is a speculative and volatile investment asset. Investors should be prepared for volatile market swings and prolonged bear markets. Digital currency can have higher volatility than other traditional investors such as stocks and bonds and market movements can be difficult to predict.
- **Economic Risk:** The economic risk associated with digital currency is in the lack of widespread or continuing digital currency adoption. The market and investors could decide that digital currency should not be valued at the current market capitalization due to a variety of factors.
- **Regulatory Risk:** Digital currency could be banned or highly regulated by governments that would deter investors from buying or holding digital currency.
- **Technical Risk:** Digital currency is a dynamic network with a codebase that is updated to add new security and functionality features. The updated code that is merged by the core developers could potentially have an error that threatens the security or functionality of the digital currency network.
- **Cybersecurity Risk:** Digital currency exchanges and wallets have been hacked and digital currency has been stolen in the past. This is a potential risk that clients must be comfortable with when investing and holding digital currency. Theft is less likely when holding digital currency at a qualified custodian in offline systems (cold storage) with institutional security and controls.
- **Limited Operating History:** Brookstone has a limited operating history in the digital currency space upon which prospective clients can evaluate its performance. There can be no assurance that Brookstone's assessment of the prospects of investments in digital assets will prove accurate or that a client will achieve its investment objective.

Alternative Investment Risk

An alternative investment is an asset that is not one of the conventional investment types, such as stocks, bonds, and cash. Alternative investments include private equity, hedge funds, managed futures, real estate, commodities, and derivatives contracts. Most alternative assets have low liquidity compared to conventional assets. Alternative investments have experienced periods of extreme volatility and in general, are not suitable for all investors.

ADDITIONAL RISK STATEMENT

The foregoing list of risk factors does not purport to be a complete enumeration or explanation of the risks involved in an investment strategy. Prospective and existing clients are encouraged to consult their own financial, legal and tax professionals in connection with the selection of and investment in a particular strategy or product. In addition, due to the dynamic nature of investments and markets, strategies may be subject to additional and different risk factors not discussed herein.

Investing in securities involves a significant risk of loss. BCM's investment recommendations are subject to various market, inflation, currency, economic, political, and business risks, and such investment decisions may not always be profitable. Clients should be aware that there may be a loss or depreciation to the value of the client's account, which clients should be prepared to bear. There can be no assurance that the client's investment objectives will be obtained and no inference to the contrary should be made. Prior to entering into an agreement with BCM, a client should carefully consider: (1) committing to management only those assets that the client believes will not be needed for current purposes and that can be invested on a long-term basis, (2) that volatility from investing in the stock market can occur, and (3) that over time the client's assets may fluctuate and at any time be worth more or less than the amount invested.

BCM does not represent, guarantee, or imply that the services or methods of analysis employed by the firm can or will predict future results, successfully identify market tops or bottoms, or insulate clients from losses due to market corrections or declines.

ITEM 9 - DISCIPLINARY INFORMATION

Firms are required to report any legal or disciplinary events that are material to a client's evaluation of our advisory business and the integrity of our management. There are no required disclosures in relation to BCM and its management team.

Disclosure information specific to your IAR can be found on their supplemental ADV 2B and is available at www.adviserinfo.sec.gov.

ITEM 10 - OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

IARs of with BCM may also be Registered Representatives or insurance agents of a non-affiliated firm such as a broker/dealer or insurance agency, engaging in the business of selling life, health, long-term care, disability, and annuity insurance products as well as securities. As registered representatives, associates may receive separate compensation in the form of commissions for the purchase of securities through their affiliated broker/dealer as well as for the sale of insurance products.

To the extent that the IAR recommends the purchase of securities, insurance or other investment products whereby the IAR receives commissions for doing so, a conflict of interest exists because the IAR receives compensation should BCM's clients elect to follow this recommendation, even if such a recommendation is based on the best interest of the client. BCM has adopted certain procedures designed to mitigate the effects of these conflicts. For example, as part of BCM's fiduciary duty to clients, the IAR will endeavor at all times to put the interests of the clients first, and recommendations will only be made to the extent that they are reasonably believed to be suitable and in the best interests of the client. Additionally, material conflicts presented by these practices are disclosed to clients at the time of entering into any new advisory or consultative arrangement.

BCM is affiliated, through common ownership, with insurance marketing organizations (IMOs) Brookstone Insurance Group and other AmeriLife owned IMOs including JD Mellberg Financial. Some BCM advisors may use Brookstone Insurance Group or other IMOs, including JD Mellberg Financial, to process insurance, including life, fixed annuities or fixed index annuities. Using any IMO including Brookstone Insurance Group and/or JD Mellberg Financial is optional for advisors and BCM is not involved in those insurance sales. BCM advisors may receive commission-based compensation for the sale of insurance and annuity products.

BCM is owned by AL BCM, of which the majority membership interests will be owned by Zayed RIA, LLC and AL Marketing, LLC ("AmeriLife"). AmeriLife is a Florida domiciled insurance company that markets and distributes annuity, life and health insurance products. Using AmeriLife is optional for advisors and BCM is not involved in those insurance sales. BCM advisors may receive commission-based compensation for the sale of insurance and annuity products.

Booster Asset Management, LLC ("Booster"), is majority owned by Dean Zayed, CEO of Brookstone Capital Management. Booster is the advisor to the Booster Income Opportunities Fund (BAMIX) and Brookstone Asset Management (BAM) is the sub-advisor to the fund. Investing in BAMIX creates a conflict of interest for Booster, BAM and Brookstone Capital Management since these firms are under common ownership and control and have a financial interest to recommend this fund.

AL BCM also owns Brookstone Asset Management ("BAM"), SEC registered investment advisors and Brookstone Wealth Advisors, LLC ("BWA" also known as Retirement Wealth Advisors or RWA), an SEC registered investment advisor. The firms under AL BCM's common ownership and control share corporate resources including management, administrative operations, and operational personnel. In addition, IARs of BWA will offer the BCM Platform to the clients of BWA; and thus, a conflict of interest exists as the firms are under common ownership and have a financial incentive to recommend the services of each other.

Certain models available within the BCM Platform contain funds managed by BAM, thus a conflict of interest

exists as BCM, BWA and BAM are under common ownership and control and have a financial interest to recommend models that contain funds managed by BAM.

A portion of BCM's business is providing back-office and administrative support services to both affiliated and unaffiliated RIAs as part of its TAMP, the BCM Platform.

Mr. Zayed is a principal and owner of Prizm Financial Advisors, Inc. (PFA). PFA is the corporation name of the entity that Mr. Zayed uses for his personal clients including financial planning, investments, insurance and tax planning.

Additionally, Mr. Zayed is a shareholder in the law firm of Perkins & Zayed, PC. As mentioned in the Services We Offer section above, BCM recommends the services of Perkins & Zayed, PC for implementation of estate planning recommendations made by BCM. This arrangement is disclosed by BCM as part of the client's agreement and by delivery of this Brochure. Should a client elect to utilize Perkins & Zayed, PC for estate planning services, the client will be required to enter into a separate written agreement for such services and pay applicable legal fees. Clients should be aware that any applicable legal fees will be in addition to and separate from the financial planning fees incurred for services as outlined in the Financial Planning Agreement. Mr. Zayed will also receive individual compensation in the form of profits due to his role as a shareholder in Perkins & Zayed, PC. This creates a conflict of interest in that Mr. Zayed, through BCM, has a financial incentive to recommend Perkins & Zayed, PC for estate planning services. The Client has the sole responsibility for determining whether to implement any such recommendations made by BCM, and which outside counsel to use for such services.

BCM currently has a partnership with Axos Bank which offers only FDIC insured products. If an IAR of BCM refers a client to Axos Bank for banking services, he or she will earn a fee for such referral.

These outside activities and affiliations create an additional conflict of interest in that BCM's CEO and IARs' obligations to these outside interests may either conflict with the advisement provided by BCM or take up a substantial amount of their time and therefore the time spent on providing the advisory services described herein may be limited by virtue of their obligations to these outside interests. Although BCM's CEO and IARs will devote as much time to the business and affairs of BCM as is reasonably necessary to deliver the advisory services described herein, they may devote a significant portion of their time to the affairs of these other activities and affiliations.

BCM has adopted policies and procedures to address the conflicts presented by these relationships. For example, as part of the firm's fiduciary duty to its clients, BCM and its IARs will endeavor at all times to put the interest of its investment advisory clients first. Additionally, the conflicts presented by this practice are disclosed to clients at the time of entering into an advisory agreement. Please refer to Item 11 for additional information.

ITEM 11 - CODE OF ETHICS, PARTICIPATION OR INTEREST IN CLIENT TRANSACTIONS AND PERSONAL TRADING

In accordance with SEC Rule 204a-1 of the Investment Advisers Act of 1940, BCM maintains and enforces a Code of Ethics. The Code requires employee, including IAR, reporting of all securities holdings and transactions and may require prior pre-clearance from the firm's Chief Compliance Officer for certain securities transactions. The Code contains requirements regarding compliance with all Laws, Rules and Regulations, and it contains provisions for reporting violations of the Code to BCM's Chief Compliance Officer. All BCM IARs are expected to be honest and ethical, make full and accurate disclosures, remain in compliance with all applicable rules and regulations, and be accountable for what they do.

BCM and its IARs act as fiduciaries for their clients. They have a fundamental obligation to act in the best interest of their clients and to provide investment advice in the clients' best interest. They owe their clients a duty of undivided loyalty and utmost good faith. They should not engage in any activity in conflict with the interest of any client, and they should take steps reasonably necessary to fulfill these obligations. BCM and its IARs must employ

reasonable care to avoid misleading clients and must provide full and fair disclosure of all material facts to their clients and prospective clients. Generally, facts are “material” if a reasonable investor would consider them to be important. They must eliminate, or at least disclose, all conflicts of interest that might incline them – consciously or unconsciously – to render advice that is not disinterested. If they do not avoid a conflict of interest that could impact the impartiality of their advice, they must make full and fair disclosure of the conflict. BCM and its IARs cannot use their clients’ assets for their own benefit or the benefit of other clients. Departure from this fiduciary standard may constitute “fraud” upon their clients under the Investment Advisers Act.

BCM and/ or its IARs may at any time own or invest in the same securities as it recommends to clients. All employees and IARs of BCM are required to submit to the BCM Compliance Department duplicate copies of all trades and account statements for review. BCM does not allow any IAR or employee to trade ahead of their clients. For individual securities such as stocks and bonds, any IARs or employees invested in the same models as clients are block traded where an average price is used.

To review a copy of BCM’s Code of Ethics, please make a written request to your IAR, contact BCM at 630-923-6850, or email compliance@brookstonecm.com.

ITEM 12 - BROKERAGE PRACTICES

As an investment advisory firm, BCM has a fiduciary duty to seek best execution for client transactions. While best execution is difficult to define and challenging to measure, there is some consensus that it does not solely mean the achievement of the best price on a given transaction. Rather, it appears to be a collective consideration of factors concerning the trade in question. Such factors include the security being traded, the price of the trade, the speed of the execution, apparent conditions in the market, and the specific needs of the client. BCM’s primary objectives when placing orders for the purchase and sale of securities for client accounts is to obtain the most favorable net results taking into account such factors as 1) price, 2) size of order, 3) difficulty of execution, 4) confidentiality and 5) skill required of the broker. BCM will recommend a broker/dealer to clients. The broker/dealer has been chosen based on the following: 1) the broker’s capital depth, 2) the broker’s market access, 3) the broker’s transaction confirmation and account statement practices, 4) our knowledge of negotiated commission rates and spreads currently made available, 5) the nature and character of the markets for the security to be purchased or sold, 6) the desired timing of the transaction, 7) the execution, 8) clearance and settlement capabilities of the broker selected and others considered, 9) our knowledge of any actual or apparent operational problems of a broker and 10) the reasonableness of the commission or its equivalent for the specific transaction. Based on the above criteria, BCM may not necessarily pay the lowest commission or commission equivalent as specific transactions may involve specialized services on the part of the broker. This would justify higher commissions (or their equivalent) than other transactions requiring routine services. If BCM is directed by the client to direct trades to a specific broker/dealer other than the custodian typically used by BCM for trade execution, it is disclosed that BCM’s ability to negotiate commissions (where applicable), obtain volume discounts, or otherwise obtain best execution may not be as favorable as might otherwise be obtained.

BCM maintains custodian relationships with broker/dealers as noted below. While clients are free to choose any broker/dealer or other service provider as custodian, BCM recommends that clients establish an account with a brokerage firm with which BCM has an existing relationship. Such relationships may include benefits provided to our firm, including but not limited to market information and administrative services that help our firm manage your account(s). BCM believes that the recommended broker/dealers provide quality execution services for our clients at competitive prices. In some cases, certain broker/dealers may not facilitate the BCM Platform as a wrap fee program, which clients should consider when selecting a custodian and evaluating fees. As stated above, price is not the sole factor BCM considers in evaluating best execution.

RECOMMENDATION OF BROKER/DEALERS INCLUDING FIDELITY AND SCHWAB

BCM may recommend the clearing, custody or brokerage services offered by Charles Schwab & Co., Inc. (“Schwab”), member SIPC, through Schwab Advisor Services, or Fidelity Institutional (“Fidelity”), a division of Fidelity Investments offering clearing, custody and brokerage services through National Financial Services LLC

or Fidelity Brokerage Services LLC, members NYSE and SIPC. Schwab and Fidelity are both unaffiliated registered broker/dealers.

Both Schwab and Fidelity provide institutional brokerage services that include access to a broad range of investment products, execution of securities transactions, and custody of client assets. The investment products available through Schwab and Fidelity include some to which BCM might not otherwise have access or that would require a significantly higher minimum initial investment by clients. Schwab and Fidelity's services described in herein generally benefit the client and the client's account.

Both Schwab and Fidelity also make available to us other products and services that benefit us but may not directly benefit clients or client accounts. These products and services assist BCM in managing and administering clients' accounts. They include investment research, both proprietary and that of third parties. BCM may use this research to service all or a substantial number of client accounts, including accounts not maintained at Schwab or Fidelity. In addition to investment research, both firms also make available software and other technology that:

- provide access to client account data (such as duplicate trade confirmations and account statements);
- facilitate trade execution and allocate aggregated trade orders for multiple client accounts;
- provide pricing and other market data;
- facilitate payment of advisory fees from client accounts; and
- assist with back-office functions, recordkeeping, and client reporting.

Schwab and Fidelity also offer other services intended to help BCM manage and further develop our business enterprise. These services include:

- educational conferences and events;
- technology, compliance, legal, and business consulting;
- publications and conferences on practice management and business succession; and
- access to employee benefits providers, human capital consultants, and insurance providers.

If you are participating in a wrap fee program (Schwab), you will not be charged brokerage commissions (transaction charges); however, please note that your brokerage account may be charged a service charge by the clearing firm, as well as potential account opening, closing, or similar servicing fees, in addition to your wrap fees. If you are participating in a non-wrap program, your account may be charged transaction fees. In some cases, no-transaction fee securities may be available in a non-wrap fee program (Fidelity) and BCM will endeavor to utilize no-transaction fee securities when possible and appropriate for the account. The no-transaction fee securities are available if the client elects for electronic delivery of statements and trade confirmations. Electing for paper or hard copies of statements and trade confirmations will result in additional costs.

BEST EXECUTION AND SOFT DOLLAR BENEFITS

As stated above, BCM has full discretion to place buy and sell orders with or through such brokers or dealers as it may deem appropriate. It is the policy and practice of BCM to strive for the best price and execution that are competitive in relation to the value of the transaction ("best execution"). In order to achieve best execution, BCM will use its best judgment to choose the broker/dealer most capable of providing the brokerage services necessary to obtain the best overall qualitative execution.

When BCM believes that more than one broker can offer the brokerage and execution services needed to obtain the best available price and most favorable execution, consideration may be given to selecting those brokers which also supply research services of assistance to BCM in fulfilling its investment advisory responsibilities. Such services may include research reports, services and seminars, computer software and related hardware for services. Selecting a broker/dealer in recognition of the provision of services or products other than transaction execution is known as paying for those services or products with "soft dollars." Some of these services are provided to BCM as part of a "bundled package" from the broker/dealer. However, BCM's clients may pay higher commission rates than those normally obtained from other brokers. Moreover, some of the services may benefit a specific segment

of BCM's clients. BCM does not attempt to match a particular client's trade executions with broker/dealers who have provided research services which have directly benefited that client's portfolio. Rather, research services received by BCM are used for the ultimate benefit of all of its clients. This also benefits BCM since it does not have to have to produce or pay for the research, products or services. Consequently, BCM has an incentive to select or recommend a broker/dealer based on these benefits rather than in the clients' interest in receiving most favorable execution.

While clients may in certain circumstances direct BCM to use a specific custodian, BCM's selection of the custodian may keep costs down. Due to BCM's relationships with Schwab and Fidelity, these firms have agreed to pay for certain expenses on behalf of BCM. Such benefits include servicing fees, taxes and ancillary fees associated with these products, which may or may not benefit, directly or indirectly, any BCM client, and will not increase any costs to BCM's clients. For more information, contact Schwab or Fidelity directly. Importantly, BCM's receipt of such benefits may or may not be offered to other independent advisors that participate in the programs. BCM is still obligated to review best execution and act in the best interest of its clients regardless of this relationship.

Notably, BCM has a conflict of interest in recommending its clients to have their assets held in custody with Schwab or Fidelity, due to the incentive and receipt of soft dollar benefits. Schwab and Fidelity may consider the amount and profitability to the custodian of the assets in, and trades placed for, BCM's client accounts when determining whether to continue providing these additional services to BCM. Currently, BCM pays no fees to Schwab or Fidelity for receiving these additional services. In furtherance of the best of interest of its clients, BCM will periodically review the broker/dealer firms used to execute client transactions, taking into account the above qualitative considerations, among others, such as reliability, accuracy, competency of bundling trades, timing of execution, and many other factors.

ORDER AGGREGATION AND ALLOCATION

BCM may combine orders into block trades when more than one account is participating in the trade. This blocking or bunching technique must be equitable and potentially advantageous for each such account (i.e., for the purposes of reducing brokerage commissions or obtaining a more favorable execution price). Block trading is performed when it is consistent with the duty to seek best execution and is consistent with the terms of BCM's investment advisory agreements. Equity trades are blocked based upon fairness to client, both in the participation of their account, and in the allocation of orders for the accounts of more than one client. Allocations of all orders are performed in a timely and efficient manner. All managed accounts participating in a block execution receive the same execution price (average share price) for the securities purchased or sold in a trading day. Any portion of an order that remains unfilled at the end of a given day will be rewritten on the following day as a new order with a new daily average price to be determined at the end of the following day. Due to the low liquidity of certain securities, broker availability may be limited. Open orders are worked until they are completely filled, which may span the course of several days. If an order is filled in its entirety, securities purchased in the aggregated transaction will be allocated among the accounts participating in the trade in accordance with the allocation statement. If an order is partially filled, the securities will be allocated pro rata based on the allocation statement. BCM may allocate trades in a different manner than indicated on the allocation statement (non-pro rata) only if all managed accounts receive fair and equitable treatment.

ITEM 13 - REVIEW OF ACCOUNTS

BCM IARs periodically review their designated client accounts on a regular basis and no less than annually. Client accounts are reviewed for appropriateness in light of each client's investment objectives, risk tolerance and financial goals. BCM's CEO, Mr. Zayed, is responsible for the general oversight of all supervised persons, and has ultimate authority over portfolio management, fundamentals, model portfolio constituents, asset allocation and areas of potential concern.

In addition to periodic reviews, reviews may be triggered when BCM becomes aware of a change in a client's investment objective, a change in market conditions, change of employment, re-balancing of assets to maintain proper asset allocation and any other activity that is discovered as the account is reviewed. The client is encouraged to notify BCM, their IAR, or Outside RIA if changes occur in his/her personal financial situation that might adversely affect his/her investment plan.

The client will receive written statements no less than quarterly from the custodian. In addition, the client may receive other supporting reports from Mutual Funds, Asset Managers, Trust Companies or Custodians, Insurance Companies, Broker/Dealers and others who are involved with client accounts, BCM has the ability to prepare written quarterly reports reflecting current positions and valuations which may be provided to all clients for managed accounts. Third party custodians also provide monthly statements. Financial planning clients receive a written copy of their financial plan with all supporting analyses.

REPORTS PROVIDED TO CLIENTS

Clients may receive a quarterly performance evaluation, a monthly activity summary statement, confirmation of all transactions as they occur, and a year-end tax summary supplemental to their account statements. All reports are provided in writing. Additional reports may be provided depending on the program and at the request of the client. All account statements are sent to the client directly from the custodian. Clients should compare any firm generated statements to custodial statements.

ITEM 14 - CLIENT REFERRALS AND OTHER COMPENSATION

ECONOMIC BENEFITS RECEIVED

BCM is provided with an economic benefit through its receipt of soft dollars in accordance with Section 28(e) of the Securities Exchange Act of 1934. BCM may enter into these “soft dollar” arrangements whereby brokerage transactions are directed to certain broker/dealers in return for investment research products and/or services which assist BCM in its investment decision-making process. The receipt of such services serves as an economic benefit to BCM, and although customary, these arrangements give rise to conflicts of interest, including the incentive to allocate securities transactional business to broker/ dealers based on the receipt of such benefits rather than on a client’s interest in receiving most favorable execution. Please refer to the Brokerage Practices section of this brochure which more fully describes these benefits and how BCM addresses the conflicts of interest.

Additionally, as described in Other Financial Industry Activities and Affiliations above, Principals and IARs of BCM may receive compensation from other non-affiliates. Such compensation shall only be received in conjunction with those services provided to such non-affiliates.

COMPENSATION FOR CLIENT REFERRALS

BCM has entered into Promoter Agreements wherein certain registered investment advisers and/or individuals are appointed to serve as a non-exclusive marketing agent, referral, and client servicing source for BCM’s managed account Platform (each a “Promoter” and collectively the “Promoters”). Through its relationship with the Promoters, the Promoter will receive payments for referral of certain clients. In the instance where BCM receives a client referral from a Promoter (*i.e.*, the Promoter was the procuring cause), BCM will pay a cash referral fee to the Promoter based upon a percentage of our advisory fee received from that particular client which is based on the client’s assets under management. Specifically:

*Based on certain negotiability factors (refer to ITEM 5 FEE SCHEDULES ABOVE), each IAR or Outside RIA is allowed to set BCM’s total investment advisory fee up to a maximum amount of 2.5% annually. The fee charged to each client includes a portion attributable to BCM and a portion attributable to the IAR or Outside RIA, which is negotiable. BCM’s fee can range from .10% to .95% annually, depending on the program or strategy selected, and the IAR or Outside RIA fee can be a maximum of 1.55%. For example, a common distribution for a total annual fee of 1.50% would include an allocation of .50% to BCM (including the asset based custodial fee if a wrap fee program is chosen) and an allocation payment of 1% to the IAR. **This example is for illustrative purposes only.** The actual total annual fee (which includes BCM’s fee and the IAR/Outside RIA fee) charged for the BCM Platform will be specified in the client’s agreement with BCM within the Investment Policy Statement (IPS) Part B.*

In addition, from time to time, BCM initiates incentive programs the compensate IARs or Outside RIAs for

attracting new assets and clients promoting investment advisory services. BCM also will initiate programs that reward IARs or Outside RIAs who meet total production criteria, participate in advanced training and/or improve client service. IARs or Outside RIAs who participate in these incentive programs will be rewarded with cash and/or non-cash compensation, such as deferred compensation, bonuses, training symposiums, marketing assistance and recognition trips. These incentive programs are paid for by BCM and do not affect fees paid by the client.

When BCM acts as a Promoter and refers a client to another adviser, BCM will receive a cash referral fee from the adviser for its referral of a BCM client. Under these circumstances, BCM will enter into a Promoter Agreement with the other adviser. All such agreements will be in writing and comply with the applicable state and federal regulations, including Rule 206(4)-1 of the Advisers Act. While the specific terms of each Promoter Agreement will differ, generally, the Promoter's compensation will be based upon a varying percentage of the assets under management by the client, or a fixed amount, which shall be paid by the adviser until the account is closed.

Each prospective client who is referred under such a Promoter arrangement will receive a copy of the applicable adviser's Form ADV Part 2A and a separate Promoter Disclosure Statement document disclosing the nature of the relationship between the Promoter and the adviser and the type and amount of compensation that will be paid to the third-party Promoter. Please note that regardless if a Promoter is used or the client comes to BCM directly, the client will not pay more than the BCM advisory fee as set forth in client's investment advisory agreement which shall not exceed 2.5%.

ITEM 15 - CUSTODY

BCM uses independent third party custodians to hold all client securities and assets. The third party custodians are primarily either Schwab or Fidelity. Clients receive monthly or quarterly statements, as well as trade confirmations, directly from the custodian. Custodial statements include account holdings, market values and any activity that occurred during the period, including the deduction of investment advisory fees. Clients should compare these statements to any other reports generated by their advisor.

For an investment advisory firm, its related entities, and/or its personnel, custody is defined as directly or indirectly holding funds or securities or having the authority to obtain possession of them. The BCM client agreement or Investment Policy Statement, or the separate agreement with any Financial Institution if applicable, authorizes BCM to debit the client's account for the amount of BCM management fees and to directly remit that management fee in accordance with applicable custody rules. BCM is deemed to have custody of client assets as a result of clients authorizing the Firm to distribute assets from their accounts to a specific named recipient in accordance with a standing letter of instruction. BCMs intends to comply with the SEC No-Action Letter dated February 21, 2017 allowing firms who comply with all of the provisions of the no-action letter to forego the annual surprise custody examination with respect to those assets.

In selecting custodial brokers for execution or recommendation to customers, BCM considers the full range and quality of services, including the value of research provided, execution capability, commission rate, financial responsibility and responsiveness to BCM in order to obtain the best execution for the client. BCM periodically evaluates the custodial broker/dealers it selects or recommends for clients.

ITEM 16 - INVESTMENT DISCRETION

BCM and its IARs and RIAs have discretion over the selection and amount of securities to be bought or sold in client accounts without obtaining prior consent or approval from the client. However, these purchases or sales may be subject to specified investment objectives, guidelines, or limitations previously set forth by the client and agreed to by BCM.

Discretionary authority will only be authorized upon full disclosure to the client. The granting of such authority

will be evidenced by the client's execution of an Investment Advisory Agreement enclosed in the IPS Parts A and B containing all applicable limitations to such authority. All discretionary trades made by BCM will be in accordance with each client's investment objectives and goals.

The client gives BCM unlimited and unrestricted discretionary authority to invest and reinvest the assets held in the investment account, including but not limited to the ability to substitute models with similar investment objectives as needed and at the client's sole risk. BCM is not required to notify the client prior to any transaction and normally will not do so. The client hereby designates BCM as the agent and attorney-in-fact with a limited power of attorney. BCM has full power to arrange for the delivery of and payment for securities purchased or sold.

ITEM 17 - VOTING CLIENT SECURITIES

BCM will not vote proxies on behalf of our advisory accounts. At the client's request, we may offer advice regarding corporate actions and the exercise of client proxy voting rights. If a client owns shares of applicable securities, that client is responsible for exercising the right to vote as a shareholder. In most cases, the client will receive proxy materials directly from the account custodian. However, in the event BCM were to receive any written or electronic proxy materials, BCM would forward them directly to the client or the client's designated agent by mail, unless the client has authorized the firm to contact him/her by electronic mail, in which case, BCM would forward any electronic solicitation to vote proxies.

For accounts subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), the plan fiduciary specifically keeps the authority and responsibility for the voting of any proxies for securities held in plan accounts. Also, BCM cannot give any advice or take action with respect to the voting of these proxies.

ITEM 18 - FINANCIAL INFORMATION

BCM does not require prepayment of more than \$1,200 in fees per client six months or more in advance – as such, a Balance Sheet is not required and not attached. There is also no known financial condition that is reasonably likely to impair this firm's ability to meet contractual commitments to clients, and the firm has not been the subject of a bankruptcy proceeding.
